## Claim Rejections - 35 USC § 103

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Ginocchio or Schwab, each in view of Applicant's disclosure.

Ginocchio and Schwab each disclose single strand rubber tie down cords having diameters. They further state that the diameter is chosen based on designed utility, Ginocchio, column 4, lines 35-43, and Schwab, column 1, lines 54-62. It would have been obvious to provide a cord diameter of 6 or more mm to achieve specific design requirements, as taught by these two references. Applicant discloses, on page 6, that the material used for his cables is known. It would have been obvious to modify the cables of either Ginocchio or Schwab whereby they are made of the known material disclosed, such being obvious so as to achieve the well known advantages of this material.

Claims 9 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Griffith in view of either Ginocchio or Schwab, and further in view of Applicant's disclosure, as applied above.

Ginnocchio and Schwab provide tie downs. It would have been obvious to use these two materials, as modified by Applicant's disclosure, as the tie downs 15 in Griffith.

## Response to Arguments

Applicant's arguments filed 6/24/04 have been fully considered but they are not persuasive.

Application/Control Number: 10/092,477

Art Unit: 3634

}

The arguments regarding the "rod" feature are moot in light of the new grounds of rejection. Regarding the extrusion, while it is true that certain manufacturing methods may effect the utility of certain materials, there has not been presented an argument as to how the extruded form of the present invention would differ from a similar article that has not been extruded.
